TRANSFORMING HAND SURGERY EDUCATION: LAUNCH OF THE "ANATOMY AT RISK" APP

The International Federation of Societies for Surgery of the Hand (IFSSH) and its educational team, Hand Surgery Resource are thrilled to announce the release of its latest new free mobile application, **"Anatomy at Risk."** Developed in collaboration with Mobileware, Inc., this innovative educational resource is now available for download on the [Apple App Store](#) and [Google Play](#).

Key Features of "Anatomy at Risk":

- **40 concise educational videos** covering dorsal and palmar hand/wrist anatomy and functional assessments.
- **Detailed explanatory text** enhanced with high-quality images, diagrams, and references.
- **Hyperlinks to related Hand Surgery Source sections** for extended learning.
- **An anatomical abbreviations list** for quick reference.

How It Works:

Simply select the location of a laceration or planned incision to access:

1. A curated list of at-risk anatomical structures.
2. Concise summary anatomy and exam videos.
3. Supporting text, images and diagrams.

Who It's For:

Perfect for students, trainees, and professionals in hand surgery, "Anatomy at Risk" provides a fast and reliable way to enhance your understanding of hand and wrist anatomy.

Why "Anatomy at Risk" Is Essential:

This app simplifies evaluating skin lacerations and designing safe surgical incisions. Whether you're repairing a laceration or planning a routine hand or wrist surgery, it offers a valuable "in your hand" resource for quick, confident decision-making.

Download Now:

Don't miss this opportunity to elevate your expertise in hand and wrist anatomy! Download "Anatomy at Risk" today on the [Apple App Store](#) or [Google Play](#).
